

Showers, Pool Fencing and Balustrades

Nanokote glass and ceramic coating is a revolutionary permanent, anti-stick protective coating that is suitable for both interior and exterior use that will cut the time cleaning your glass and ceramic surfaces by up to 90%! Nanokote is invisible, extremely durable and instantly repels most substances that come into contact with it. Unaffected by UV, Nanokote's unique coating material is the industry leader in protective coatings, significantly outperforming similar coatings and is shown to be 6 times more durable.

Discover the Nanokote WA difference

- Delivering the best enviro-friendly solutions
- Using revolutionary nanotechnology
- 100% Australian developed and manufactured
- Providing the most advanced durable coatings
- Reliable 'on time, every time' guaranteed
- All applications professionally carried out by the owners of Nanokote WA, Paul and Adam

Nanokote - why it's the best!

Developed and manufactured in Melbourne, Nanokote has worked closely with the CSIRO for 15 years in the research and development of commercial applications for nanotechnology. In a recent independent test Nanokote is shown to be the most effective and durable glass and ceramic coating on the Australian market.

Nanokote permanently seals the surfaces by setting up a protective barrier enabling water to bead on the surface. This then protects the surface from build up of calcium and contaminants found in Perth's poor water supply.

Uncoated

Coated

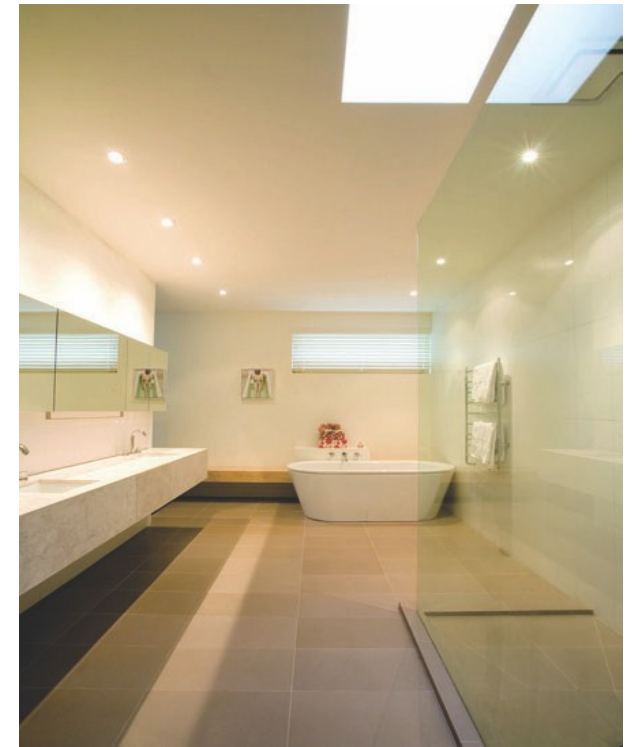

Restore and protect

New glass screens not in your budget? Why not save money and the environment by restoring your existing water damaged glass and ceramics? We can restore your old surfaces to almost brand new then protect with Nanokote for a fraction of the cost without the hassle!
